

Make Modern Payments a Reality

More than just processing a payment transaction, Ren is a pathway to innovation, allowing our customers to keep pace in an ever-changing financial environment.

Next-generation innovation platform well positioned for the evolving payments landscape interface needs.

The Ren API Gateway supports unique and diverse connections to external systems through various channels and message types. Ren API Gateway allows organizations to connect to external entities through a standard interface specification and/or easily enable interfaces based upon external entity-provided specifications.

Minimal risk and easy integration with external systems, acquiring channels, and partners.

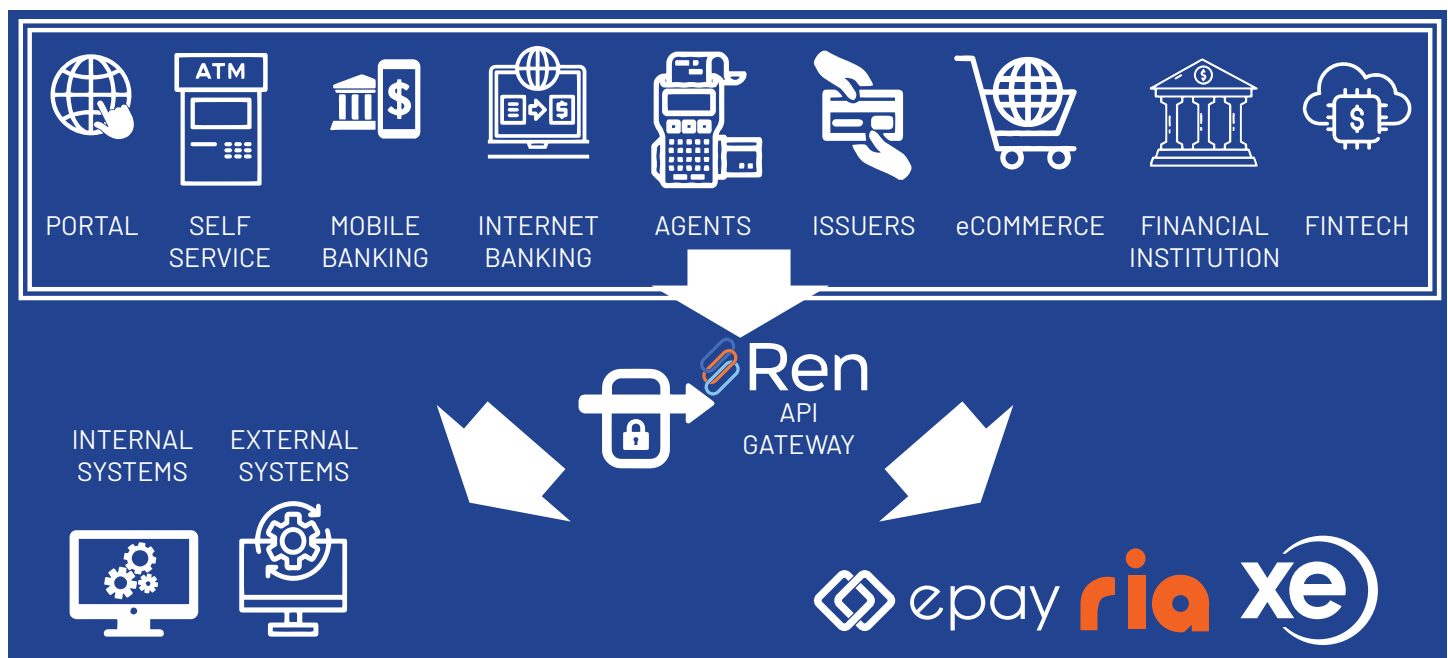

The Ren API Gateway supports industry-standard interface methods (e.g., RESTful services, SOAP-based services, ISO 8583, ISO 20022, XML, JSON, etc.) as well as best practices security models (e.g., OAuth 2.0, session tokens, certificates).
