

Make Modern Payments a Reality

Ren QR Payments and Addressing Service

Consumers can make hassle-free payments without physical cards. Proxies and aliases for payment methods have gained popularity as consumers and merchant-acquiring channels shift toward more secure and convenient alternative payment instruments like mobile phones, mobile wallets, and tokens. By using a proxy or alias to identify the payment initiator and recipient, the information related to the payment instrument remains protected and secure.

The Ren QR Payments System is an easy-to-use, secure, and cost-effective contactless payment platform that uses QR codes to make merchant payments. Our state-of-the-art platform complies with EMVCo QR specifications. The Ren QR Payments System empowers merchants to eliminate POS terminals and accept payments via a dynamic or static QR code generated from the Ren QR mobile app.

Ren QR Payment System Features:

The Ren QR Payment System is an easy-to-use, secure, and cost-effective contactless payment platform which consists of the following features:

- Administration Portal
- Merchant Portal
- White Label Consumer Mobile App
- White Label Merchant Mobile App
- Support for push & pull payments
- EMVCo compliant QR code generation and validation
- Support for less sophisticated phones without QR scanning capabilities via manual input of code associated with QR code
- Extensibility to existing external acquiring channels using Ren API Gateway and QR APIs

Ren Addressing Service:

Ren supports the ability to process payments using alternate payment instruments. The consumer may instead perform the payment using an alternate identifier registered in the Ren Addressing Service.

This feature can support a variety of alternative payment channels, emerging payment methods, and directory lookup services. The Ren Addressing Service is designed to connect consumer and system-defined proxy identification values with various supported payment instruments, such as:

- Proxy ID
- Wallet ID
- Mobile ID
- Payment instrument Alias
- Token
- Unique ID
